How LP, Rank Progression, and Hidden Counters Work

THE SHORT VERSION

KEY CONCEPT

Ranked is **not just one LP number**. The game also tracks hidden promotion and demotion counters. These counters explain why you sometimes rank up before your LP bar hits the top, or rank down even when your LP isn't at the floor yet. Each character has **completely separate** ranked progress.

UNIVERSAL RULES

Rule	Detail
Rank change resets LP	When you rank up or down, your LP resets to the middle of the new rank.
Rank change resets counters	Both promotion and demotion counters reset on any rank change.
Same-rank LP (LV10+)	Winning or losing against the same rank gives or costs ±1,024 LP .
Rank gap scales LP	Each rank of difference halves the LP gained or lost. See chart below.
Beating higher ranks	LV11–LV24: +25% bonus per rank above you, stacked. Capped at LV25+.
Losing to lower ranks	Still costs less LP — the same halving formula applies going down.

LP GAIN/LOSS BY RANK DIFFERENCE

Both wins and losses scale by the same formula — each rank of difference cuts the LP in half.

Same rank = ± 1024 · 1 rank diff = ± 512 · 2 ranks = ± 256 · 3 = ± 128 · 4 = ± 64 · 5 = ± 32 · and so on down to ± 1

RANK TIER OVERVIEW

All ranks fall into one of these buckets. Promotion and demotion counter rules change as you climb.

	RANK RANGE	PROMO	DEMOTION	LP RANGE
LV1–LV10 Beginner	LV1–LV10	—	—	+100/win
LV11–LV18 Normal	LV11–LV18	ON	—	± 1024
LV19–LV24 Intermediate	LV19–LV24	ON	—	± 1024
LV25–LV29 Advanced	LV25–LV29	ON	ON	± 1024
LV30–LV35 High Rank	LV30–LV35	ON	ON	± 1024
Leader–Hero Elite	Leader–Hero	—	ON	± 1024
Kisshin–Ruler Top Rank	Kisshin–Ruler	—	ON	± 1024

PROMOTION COUNTER

Active from **LV11 through LV35**. Fills from wins against opponents within 2 ranks of you. When it reaches its internal limit, you rank up immediately — even if your LP hasn't reached the top of the bar yet.

HOW IT WORKS

Only wins against opponents **within 2 ranks** of you add to the promotion counter.

The counter limit is rank-dependent — higher ranks need more qualifying wins.

LV34 and LV35 have especially large promotion-counter targets.

Once you hit LV36 (Leader), promotion counter is gone. You rank up the **old fashioned way** — LP bar only.

DEMOTION COUNTER

Active from **LV25 onwards**. Tracks qualifying losses. At 5 strikes you rank down, even if your LP is not at the floor of the rank.

HOW IT WORKS

5 strikes = forced rank down, regardless of current LP.

A qualifying win resets all strikes back to zero. What counts as qualifying depends on your tier.

Only specific losses add a strike — low-rank opponents typically don't count.

The demotion counter and LP floor are two separate ways to fall a rank. Either can trigger first.

WHAT RESETS THE DEMOTION COUNTER?

Tier	Losses that add a strike	Wins that reset strikes
LV25–LV29	Same-rank losses	Wins against LV23 or higher
LV30–LV35	Losses against opponents within 2 ranks	Wins against LV25 or higher
Leader–Hero	Losses against LV30 or higher	Wins against LV25 or higher
Kisshin	Losses against LV25 or higher	Likely LV25 or higher (still being verified)
Hades–Ruler	Losses against LV25 or higher	Wins against LV30 or higher

TIER BREAKDOWN — BEGINNER & NORMAL

LV1 – LV10		Beginner
WINS + Each win gives +100 LP. + You rank up when LP reaches the top of the rank. LOSSES - No LP loss on loss. - No rank-down behavior.	PROMOTION COUNTER No promotion counter. LP only. DEMOTION COUNTER No demotion counter. Note: This is the beginner bucket. Losses don't cost LP here.	
LV11 – LV18		Normal Ranked
WINS + Same-rank win: +1,024 LP. + Higher rank win: +1,024 + ~25% per rank above you (stacks). + Lower rank win: halved per rank below (+512, +256, +128...) LOSSES - Same-rank loss: -1,024 LP. - Different rank loss: halved per rank gap (-512, -256, -128...) - LP floor triggers rank-down.	PROMOTION COUNTER Active. Qualifying wins (opponent within 2 ranks) fill counter. Can trigger early rank-up. DEMOTION COUNTER Not active.	
LV19 – LV24		Intermediate
WINS + Same-rank win: +1,024 LP. + Higher rank win: +1,024 + ~25% multiplier per rank above you. + Lower rank win: halved per rank gap. LOSSES - Same-rank loss: -1,024 LP. - Different rank loss: halved per rank gap. - LP floor triggers rank-down.	PROMOTION COUNTER Still active. Qualifying wins fill counter. Ceiling is higher here than LV11-18. DEMOTION COUNTER Technically has an internal value, but it is not used. No demotion counter in practice. Note: The demotion counter variable exists in code but has no effect at this tier.	

TIER BREAKDOWN — ADVANCED TO HIGH RANK

LV25 – LV29

Advanced

WINS

- + Same-rank win: +1,024 LP (hard cap — no more +25% bonus).
- + Lower rank win: halved per rank gap.

LOSSES

- Same-rank loss: -1,024 LP.
- Different rank loss: halved per rank gap.
- LP floor OR demotion counter can trigger rank-down.

PROMOTION COUNTER

Still active. Builds on wins against opponents within 2 ranks.

DEMOTION COUNTER

Active. Same-rank losses add 1 strike. At 5 strikes: rank down. Wins vs LV23+ reset strikes.

Note: This is where the +25% higher-rank bonus disappears. LP gains are now capped at 1,024.

LV30 – LV35

High Rank

WINS

- + Same-rank win: +1,024 LP.
- + Lower rank win: halved per rank gap.

LOSSES

- Same-rank loss: -1,024 LP.
- Different rank loss: halved per rank gap.
- LP floor OR demotion counter can trigger rank-down.

PROMOTION COUNTER

Still active. Builds on wins within 2 ranks. LV34-35 have larger promotion targets.

DEMOTION COUNTER

Active. Losses within 2 ranks add 1 strike. At 5 strikes: rank down. Wins vs LV25+ reset strikes.

Note: Demotion strike condition broadens: within-2-ranks losses now count (not just same-rank).

TIER BREAKDOWN — ELITE & TOP RANK

Leader – Hero

Elite Tier

WINS

- + Same-rank win: +1,024 LP.
- + Lower rank win: halved per rank gap.

LOSSES

- LP loss scales by rank gap as usual.
- LP floor OR demotion counter can trigger rank-down.

PROMOTION COUNTER

Gone. No promotion counter at this tier. Rank up by LP bar only.

DEMOTION COUNTER

Active. Losses vs LV30+ add 1 strike. At 5 strikes: rank down. Wins vs LV25+ reset strikes.

Note: The promotion counter disappears here permanently. No shortcuts to the next rank.

Kisshin – Ruler

Top Rank

WINS

- + Same-rank win: +1,024 LP.
- + Lower rank win: halved per rank gap.

LOSSES

- LP loss scales by rank gap as usual.
- LP floor OR demotion counter can trigger rank-down.

PROMOTION COUNTER

No promotion counter.

DEMOTION COUNTER

Active. Losses vs LV25+ add 1 strike. At 5 strikes: rank down. Reset rules differ by sub-rank — see notes.

Note: Kisshin uses LV25+ to reset. Hades and Ruler appear to need LV30+ wins to reset. Still being live-verified.
